$\begin{array}{c} {\rm Elementary\ Coding:\ Sheet-03}\\ {\rm\ PIPTP} \end{array}$ (Post Immersion Practice Only Training Program)

S.N.	Problem Title	Description	Mettl Practice Test Link
String Based Programs			
1	Find String Code	Generate a numeric code based on ASCII values of characters in the given string.	<u>Link</u>
2	Get Code Through Strings	Derive a code using transformation logic applied to the input string.	<u>Link</u>
3	Addition Using Strings	Add large numbers provided as strings without converting directly to integers.	<u>Link</u>
Array Based Programs			
4	Simple Encoded Array	Decode or encode elements in an array based on a given rule.	<u>Link</u>
5	Decreasing Sequence	Check or generate a sequence where each element is smaller than the previous one.	<u>Link</u>
6	Most Frequently Occurring Digit	Identify the digit that appears most often in the array elements.	<u>Link</u>
Number Based Programs			
7	Sum of Powers of Digits	Calculate the sum of digits each raised to a specific power.	<u>Link</u>
8	Sum of Sums of Digits in Cyclic Order	Compute sums of digits for cyclic permutations of a number.	<u>Link</u>
String Based Programs (Part-2)			
9	Identify Possible Words	Find all possible words that can be formed with the given characters and constraints.	<u>Link</u>
10	Encoding Three Strings	Encode three separate strings into a combined coded form.	<u>Link</u>
